

Mr.Wax are lamps that change style over time: at the beginning, at ambient temperature, the material is white and opaque, and then, heated up by the incandescent light bulb, becomes completely transparent revealing a hidden pattern inside. The process is completely reversible and infinite: when you turn off the light, the material goes back to its original state, producing some very beautiful crystals on its way back.

HOW IT WORKS:

When it is off it is a white and minimal solid cylinder.

When you turn it on the heat of the light bulb slowly melts the material inside. The phase changes from solid to liquid, from opaque to transparent, gradually revealing the hidden decoration.

The lamp changes style in time. Every lamp can have a different pattern. The decoration can be in Liberty style, Baroque, Street Art, Pop Art, Damasqued, Floral, etc. Other decorations in the lamp can be custom designed upon request.

To reveal itself partially or completely, Mr.Wax takes from 30 to 70 minutes, according to the size of the lamp and thermal conditions of the environment.

If you turn it off again Mr.Wax cools down going back to its solid state, growing beautiful fractal crystals on the surface slowly hiding the decoration. The reveal-hide process is completely reversible and infinite.

Transformation sequence, Mr.Wax Little - Autumn

Table version, ficus leaves pattern

Floor version, damask pattern

Wall version, dragons pattern

Pendant version, custom pattern
